

HARMONIZING ACCREDITATION REPORTING

A Symphony of Microsoft Teams, Word, PowerShell, Quarto & Pandoc

Presenter: David Onder, Director of Institutional Excellence, Research, & Grants | Haywood Community College

The Big Idea (Score)

Single-source reporting from Microsoft Word. Write and edit standards in Word as usual, then automatically generate:

- Interactive website for digital review
- Submission-ready PDF for archival / formal review

Why this matters: fewer version problems, less manual copying, no new platform costs.

The Orchestra (Tools & Roles)

Microsoft Teams	Collaboration hub & file home; standards + artifacts organized consistently.
Microsoft Word	Authoring instrument; staff write in familiar templates/styles.
OneDrive Sync	Bridges Teams to local machine for automation access.
PowerShell / .bat script	“Conductor” that triggers conversion + rendering.
Pandoc	Translates Word → clean Markdown.
Quarto	Renders Markdown into Website + PDF.

Harmony vs. Dissonance

Harmony (Pros)	Dissonance (Considerations)
• No added software cost Staff stay in Teams + Word • Automation reduces copy-paste & drift • Transparent, auditable workflow	• Requires light scripting/setup • Primarily Windows-tested • Less ideal for Google-first environments

The Rehearsal (Workflow)

1. **Compose (Teams/Word):** Staff edit standards in Word within Teams “Standard” folders.
2. **Sync (OneDrive):** Sync the Teams library locally (use Sync, not “Add Shortcut”).
3. **Conduct (PowerShell):** Run `convert_and_render.bat` to begin automation.
4. **Translate (Pandoc):** Word formatting is stripped and converted to Markdown.
5. **Perform (Quarto):** Markdown renders simultaneously to a Website and PDF.

Backstage Mechanics (Configuration)

- `_quarto.yml` – project structure and defaults
- `_quarto-website.yml` – website nav, branding, contacts
- `_quarto-pdf.yml` – PDF layout, metadata
- `custom.scss` – colors, fonts, visual styling

Start Your Own Orchestra

- Prereqs: build Teams folder structure + sync locally; install Quarto and Pandoc; clone compliance-report repo.
- Repo: github.com/Haywood-Community-College-IERG/compliance-report
- Quarto: quarto.org
- Pandoc: pandoc.org
- Video: youtu.be/n2Owl0Sy1F0
